### PERSONAL PROFILE

Highly motivated Full Stack Developer with 6+ years of experience specializing in Ruby on Rails backends and React.js frontends. Proven track record of building scalable web applications with clean, maintainable code and excellent user experiences. Skilled in agile methodologies and collaborative development environments.

### WORK EXPERIENCE

#### FullStack Developer

ShareableInnovations | Oct 2022 - Present

- **TDD Implementation:** Created comprehensive test suites using RSpec for Rails controllers and models, maintaining 90% test coverage
- **Microservices Architecture:** Designed and implemented Ruby on Rails API services within a hexagonal architecture pattern
- **React Component Library:** Developed a reusable component library with TypeScript and React, reducing frontend development time by 35%
- **API Integration:** Built robust Rails API endpoints handling complex business logic and database interactions

#### Ssr. React+Next Developer

Tecabot | Aug 2023 - Apr 2024

- **Ruby on Rails & React Integration:** Developed and maintained modular backend services using Ruby on Rails that powered React/Next.js frontends.
- **Performance Optimization:** Reduced API response times by 40% through SQL query optimization and proper Rails caching implementation
- **Deployment Management:** Orchestrated deployments using AWS Amplify, ensuring zero downtime during releases

## COURSES

- 📖 The Web Developer Bootcamp, Udemy (2016)
- 📖 NestJS Zero to Hero - Modern TypeScript Back-end Development (2020), Udemy (2018)
- 📖 JavaScript School, Platzi 2019
- 📖 CS50's Introduction to Computer Science, 2024

## LANGUAGES

- English
- Spanish

## Frontend Developer

Aicive | Mar 2022 - Oct 2022

- React/GraphQL Development: Built data-intensive interfaces using React with Apollo Client connecting to Rails GraphQL APIs
- AI Integration: Integrated MediaPipe for movement recognition within React applications
- State Management: Implemented Redux for complex state management in large-scale React applications

## FullStack Developer

Deglotec | Feb 2018 - Mar 2022

- Multi-Framework Development: Created applications using React.js, Vue.js and Sencha with Rails backends
- Comprehensive Testing: Established complete testing pipelines with Nightwatch, Cypress, and Jest for frontend; RSpec for Rails backends
- Database Design: Modeled complex database schemas in PostgreSQL for Rails applications, implementing efficient queries and indexing

## KEY ACHIEVEMENTS

- Reduced page load time by 60% through React component optimization and Ruby backend caching strategies
- Implemented Ruby on Rails API endpoints that handle 1M+ daily requests with 99.9% uptime
- Created a reusable React component library used by 5 development teams, standardizing UI across multiple projects
- Migrated a legacy application to a modern Rails/React stack, reducing code base size by 30% while adding new features
- Mentored 3 junior developers in Ruby on Rails and React best practices, accelerating their productivity by 25%
